PERSONAL PROJECTS

Headless (02/2019 – 03/2019)
- Description: Headless is a Headless Content Management System (CMS). It has functionalities to create content, edit or delete them. Contents can have fields such as text, numbers, JSON, media, etc. After creating the content, the user is provided with APIs and API key to use their content in any application.
- Tech : Angular, Django, AWS DynamoDb, AWS Lambda
- Key Deliverables : Admin Panel to manage content. Rest APIs for the contents.

Bira - Issue Tracker (Front-end & Back-end) (02/2019 – 03/2019)
- Description: Bira acts as a platform to provide issue tracking services to the user. It provides the support to CRUD operations on issues while maintaining the users and project details to which the issue is related to.
- Tech : Angular, Django, PostgreSQL, SQLite
- Key Deliverables : REST APIs. Bira UI for issue tracking

Leave Tracking (Back-end) (02/2019 – 02/2019)
- Leave tracking application is used to track the leaves of a user working at a organisation according to the rules followed by them. Helps the employee to apply for leaves, get leave balance and other features.
- Tech : Java, Spring Boot
- Key Deliverables : REST APIs. Unit Test Cases

TekBooks (05/2018 – 06/2018)
- Description: NodeJS Backend Website with online Book Order, Shopping Cart & Purchase
